BEGINNERS GUIDE TO BASIC DIXIELAND TUNES

Preface

The purpose of this book is to perpetuate Dixieland Jazz by providing a practical tool that you can use to learn the music, in a format you can use in performance. It includes all the basic tunes, plus classics known and less-known, and some practical tunes you might play on hotel gigs. You'll be able to play with commercial bands, or even start your own band.

The notes and chords are taken from a wide variety of sources, including the original records. The object has been to make the sheets as authoritative as we can, and as feasible relate them to recordings so you learn tunes by playing along.

Published fakebooks, eg. Hal Leonard's excellent "Ultimate" series, have many "pop" dixieland tunes, but they often have more modern chords, and the few multi-strained classics have only the melody strain. "Sheet music" collections are useless on the bandstand. A succession of "under-the-counter" fakebooks by musicians have helped sustain the music, but are hard to find, and neither their notes nor chords are authoritative; no "legal" fakebooks been published.

Phrasing--The tunes as published frequently had phrasing very different from the way bands actually play them–ie, originally square phrasing typical of 1920s music usually is played swingy–so you must learn to hear the tune's melody but play it in the phrasing style appropriate to the tune, or to the band you're working with. When you can do that, you have taken the first step in "faking"–improvising. In most cases, two 8th notes are played sort of like a dotted 8th and a 16th, but not quite; here, a succession of dotted 8th-16th combinations is written as all 8th notes.

Tempo values–Each sheet has a tempo value; it should be taken as a starting point until you have specific reason to change it. Vocal tunes are played somewhat slower as vocals than as instrumentals; as sing-alongs even slower. Instrumental tunes (ie the multi-strained tunes) are usually faster. Try singing the tune; usually don't play it any faster than the words are comfortable. Another benchmark is the tempo at which the tune is most effective as a *dance* tune. *Virtually all tunes have a segment of several bars where playing the correct tempo is crucial: too fast and the melody or lyrics feel hurried, too slow and the passage drags; the best tempo for the passage is the best tempo for the tune as a whole.* Most tunes should "swing", some should "rock"; I think all should make the body want to *move!*

Basically this is rompin' and stompin' music, but *Slow tunes* can maintain the feeling: curiously, on miscellaneous public gigs, the greatest, often the only, applause, is more often for slow tunes, such as "Do you know what it means to miss New Orleans" played very expressively, or "Basin Street Blues" played very rhythmically, not the virtuosic killer-dillers. Some slow tunes are more suitable for expressive playing than others–those that *make* you wail probably will get the most audience response...

I feel that all but concert gigs should be played as dance gigs; do that and the music more likely will be most effective, ie. have the greatest impact on the audience. When playing tunes in

Concert situations, if you want to play at "virtuoso display" tempos, that's cool: your function is to be you...But good body-movement tempos probably will get the most response. When planning sets for any type of gig, the best mix makes various parts of the body move, the whole body move in different ways, and occasionally sparks cheers at virtuosity. Study the performance notes, find the precise tempos that make you and your colleagues bounce, groove, swing and stomp the hardest; make lists of tunes that produce the same results; make set lists that mix maximum variety; do it all over again.

There are two main types of improvising: 1. Playing variations on the melody: You have the melody and chords in your head, and you add notes, change the phrasing, etc. 2. Creating something new over the chords. Some musicians who know at least bits and pieces of many tunes enjoy quoting melodies or famous solos during their solos; sometimes the other musicians pick up on this and go 'round and 'round until they run out of quotes; that's not improvising, but it can be a lot of fun and grab audiences.

Some of the classic records play the melodies quite differently from the published music. There seems to be no "definitive" version. On some tunes the classic record has so many variations of the "melody" that all one can do is suggest a workable approximation; in some cases the record was the only source available. Sometimes, we simplified the melody and chords for playability.

Note that some tunes have the VERSE and CHORUS. When you see "CHORUS" at the beginning of a tune, the VERSE is at the bottom. Usually *the verse is optional, but sometimes it is a standard part of the tune as usually played.* I tried to include the verse if it has a significant melody, and indicate when it is usually played.

Most of the tunes are arranged in straight alphabetical order; ignore apostrophes in contractions–all the "I" tunes are together, as are "If, I'm, I've", in that order. However, a few tunes take up only half a page or less, so to save space, I've put most of them on 2-3-tune pages, and some are added on to two page tunes. Some tunes are out of alphabetical order to enable the pages of 2-page tunes to face each other. The tunes out of order are italicized in the Index.

Playing Dixieland

Rhythm playing is the main subject of this essay, though there are a few notes at the end for the horns. Old music has its own rhythm styles, just as modern jazz and rock do. And if any of the rhythm players barge ahead and do their own thing, they can destroy the impact of the music, even take all the fun out of it for everyone else in the band and audience. They aren't teaching old-style rhythms in school at any level, so the teachers don't know them either.

Younger rhythm-folk and anyone else who doesn't know the music, *Hear This:* In old music, the rhythm section sits *behind* the horns, both physically and artistically. Your job is to make the horns sound good and the dancers groove the roof. You are the *rhythm* section; unlike modern jazz and pop players, you are *not equal* to the horns. You provide, *appropriate* rhythm, strokes, and chords. *KISSS method--Keep It Simple, Solid and Soft--Yes, S-O-F-T:* the *horns* control the *volume* dynamics--you follow them and make sure you don't play louder than they do!!

Before you stroke a lick, notice the instrumentation. In fact, when you get booked, ask the bandleader about the:

- Instrumentation in the band.
- Rhythm style he/she/it wants.
- Repertoire being played.

Now, figure out what kind of strokes you are going to use. That is, will the *bass* or *tuba* play 1&3 or 4-4; will the *piano* boom-chuck, do mainly right-handed zaps, stride, or ricky-tick all night? Will the *drummer* ride the big cymbal or do brushes or go b-o-o-m chick or do "4-on-the-floor" bass drum, or play a lot of press rolls? ---> If there is a *banjo*, the drummer should stay off the ride cymbal; use nice whacking brushes with the guitar for non-slow tunes. Listen to what the horns are doing as a group or individually, and support them; if they are syncopating, play straight 4--it'll send their notes flying into the stratisphere.
Banjos and *guitars* can play a powerful dynamic role simply by proper choice of chopped 4-4, off-beats, or held strokes. Zaps and solos are part of the fun of playing dixieland; but comping is an art, and a worthy rhythm person knows how and when to comp; knows how to play the various rhythm styles; can feel whatever style is being played; and supports the effort by playing appropriately. The rhythm section

- is a unit: a good one liberates dancers;
- is unnoticed by horns because they are so comfortable they are playing above their norm;
- is so unified that the individual instruments well might barely distinguishable to listeners; maintains a balance of sounds.

Routines

Verses: Most old songs had a *Verse*. The verse may or may not played in a particular tune depending on tradition; it's usually before the melody (first) chorus, but often may be played after the melody, and often is played again before the out choruses. EG. Verse-Chorus-Solos, Chorus-Verse-Chorus-Solos, Chorus-Verse-Solos-Verse-Chorus.

Endings are usually more or less at the whimsy of the lead horn, but there are some tunes with well-known endings. *Standard patterns:* Any tune may have 1 or 2 "out" choruses. "Traditional

jazz" bands end multi-strained tunes with a 2-bar extended or "double" ending, using the same chord, inserted between bars 31 and 32 (23 and 24 for blues, which are usually played 2 X per strain); and may use double endings for anything fast. However, the piano-bass / *Eddie Condon* style bands often use the *drum tag* pattern: Sudden ending, 4 bars drums (maybe 8), 4 bars (maybe 8) band tag. Dance band or jazz horn players often use the I / VI ending. Routines vary from band to band, depending in part on which, if any, classic version of the tune is being copied.

Breaks and *Stops* are very important in traditional jazz. Rhythm is silent or plays a specific beat pattern ("stop"), while a horn solos. You *ZAP* the first note of the break. Some breaks (Tiger Rag) and stops (Dippermouth Blues) are standard parts of the tune; others are part of a band's arrangement, or are called ad hoc by a horn, or even rhythm person: > - - - or >>> - or - > - > (- is a tacit beat; > is a band zap on the beat). If played with authority, they really zip up the tune and make it more fun to play. Be prepared to take a break of one or two bars without advance warning--someone may turn around suddenly and point to... *you*. A nifty break by a newcomer is most impressive. They may be testing you.

Dynamics are very important. Volume well might vary from strain to strain or chorus to chorus. If there are 2 band "in" choruses, 1st is "up", 2nd is "down" ; if 2 out choruses, 1st is down, 2nd is up. Or vice versa. A great effect is to drop the volume of bars 17-23 in the out chorus, then really hit the last 8 bars. Many lead horns, especially in small formats, open and close with the melody, playing it "down". Some consistently play a hot out chorus. Follow the leader !!

1920s pop tunes. This is "square" two-beat music. *Piano* mostly boom-chucks, or syncopates as a change-up. *Banjo* often plays 2 - 4, changing-up with a 4 - 4, gliss, or occasional mummers stroke. *Tuba / bass* mostly does 1- 3. *Drums* use *bass* on 1 - 3 , *snare* on 2 - 4, with frequent zaps on *choked* 6", 8" or high-hat cymbal. Chords often change in 3 beat cycles (the usual is 4 or 2!!) Eg: C..G7 ..C. This pattern is not used much in Dixieland, but if you ever play the original stock charts or in the 20s style, you'll need to practice it.

The Horns Many of the general comments on the music apply to the horns. Here are some considerations for the front line. *Style is important.* Dixieland played by modern jazz players, no matter how good they are, usually sounds like hell because Dixieland isn't Bebop: it isn't "cool", it's "hot". This statement is directed at *you* as an individual, playing with a group of traditional style players. Of course, if the other players are beboppers, the music may be great--But it ain't Dixieland and if your audience–the ones paying the freight--expects Dixieland, the folks may be disappointed. As a minimum, you should be able to play 30s swing-style, without extended chords, with a warm, not "cool" sound.

Solos: The traditional New Orleans style featured *ensemble* playing, with very few solos, except in breaks. However, most bands structure the performance of each tune with one or two ensemble choruses going in, maybe chorus-verse-chorus, or verse-chorus, a string of solos, one or two out ensemble choruses. It all-too-rarely occurs to the musicians that the same routine tune after tune can be b-o-r-i-n-g to the audience. Even when the performance is varied with more or less fancy arrangements going in or out, the solos remain.

Consider this: do you really have something interesting to say or hot licks or fancy gimmicks for

every tune? Sure, you have fun soloing, and of course some of your best moments come from the stimulation of what's happening at the moment. But if you find you feel no inspiration during a tune, why not pass on it rather than bore the audience? It seems that most of the time, the rounds of solos occur in mindless cycles. This isn't so bad for fast tunes, but a lower tempos, especially slow tunes, it makes the tunes drag on and on. Try splitting up the solos into 16- or even -8 bar segments. Harmonize with other horns behind the solo. As a listener, I really don't get much pleasure from 9 choruses of "Georgia"--4-5 will do just fine...

Liberal use of mutes provides a great change-up in the sound of the band--the brass can do straight or solotone mute harmonies behind the clarinet, or use the mutes during ensembles.

Dixieland styles:
There are several basic styles. 1. New Orleans traditional, 4-beat, usually neither "fast" nor "slow", and features much ensemble playing. 2. The most commonly played style is New York/Chicago/Eddy Condon, piano-bass-(guitar), which essentially is a form of 4/4 swing, has a greater variety of tempos and tunes, from slow to hot/fast, features rounds of solos. 3. "Ragtime", which is square and not played that often for entire gigs. 4. 1940s New Orleans "Revival", hard square 4-beat. 5. West Coast "Revival", 2-beat (banjo-tuba), not "fast".

Tune sources: CDs and music books
If you intend to play Dixieland regularly, listen to the old records. There are many CDs of just about everything you'd need. The original *Audio Fidelity* "Dukes of Dixieland" records (to date only one CD has been issued) have all the cliches and patterns, and are great learning tools. Turk Murphy (well represented on CD) did all the trad and saloon tunes. The *Stomp Off* label has current bands playing 20's jazz. Robert Parker's CDS label stereoizes many basic 20's and 30's records; John R. T. Davies' "restorations", which are found on many CD labels, seem to get the most sound out of the 78's.

The *best learning tool is a* tape recorder *under your chair recording every performance*, rehearsal--every time you play. Listen to it as soon as you get home, to hear what was right or what you screwed up--what didn't fit and what made the band sound better--while you still remember the gig and what you were thinking while you were playing. This is the quickest way to become useful in a band or solo context. Don't let the bad stuff get you down; look for what's right and practice it; note what to avoid in the future, so you don't get into any bad habits. Do use your tapes for reality checks--new players and bands usually don't know when they are playing well or badly. Even experienced musicians have times when a performance felt good and was actually terrible...

Remember: *You're there to entertain the audience. As an individual, you are there to make the band sound better, and make the client want to have the band for his/her next event. You never know who's in the audience, so always conduct yourself in a professional manner, on and off the bandstand. If you're playing with the band for the first time, check with the leader from time to time to see whether he wants you to play more or less conservatively.*

Have fun, break a leg, and *vaya con dinero.*

Intro *[By entire band]* **Trumpet Intro** *[Trumpet or lead horn only. If no chords, is solo, no rhythm]*

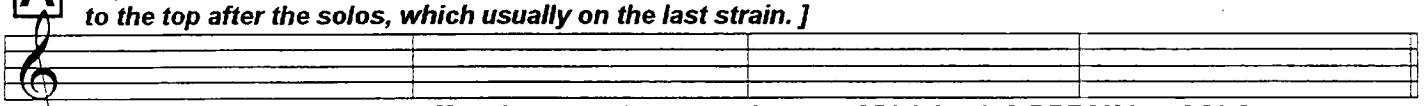

Chorus *[Main melody begins here. SOLOS are played on Chorus. Check below for VERSE; sometimes the Verse is played first; Intro may be above the Verse. Sometimes Chorus is played first, then Verse, Chorus (or solos), Verse again after Solos. It's usually optional, except for tunes that are classic set pieces.]*

Verse *[Some verses are considered "part of the tune" because they are on the original record; most are optional add-ons. They do add to the variety of the tune. If the verse has no particular musical or "classical" value, I've omitted it.]*

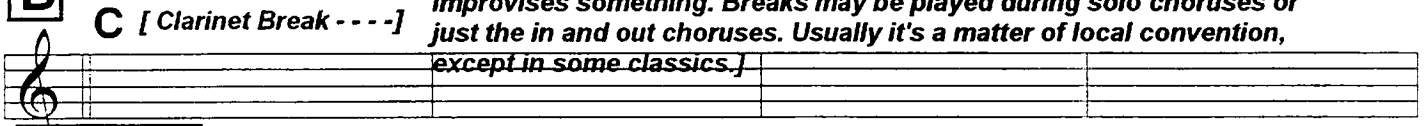

A *[Many classic tunes have several strains, labelled A, B, C, etc. Each strain may be in a different key. They are all part of the tune. They may or may not repeat. Sometimes it's neat to go back to the top after the solos, which usually on the last strain.]*

B

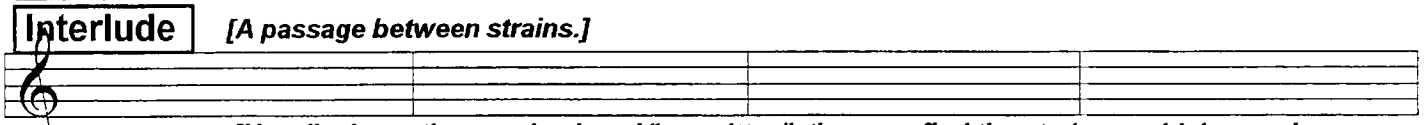

C *[Clarinet Break - - - -]*

[Breaks are an important feature of Dixieland. A BREAK is a SOLO passage. Band or Rhythm hits the first beat chord sharply, soloist improvises something. Breaks may be played during solo choruses or just the in and out choruses. Usually it's a matter of local convention, except in some classics.]

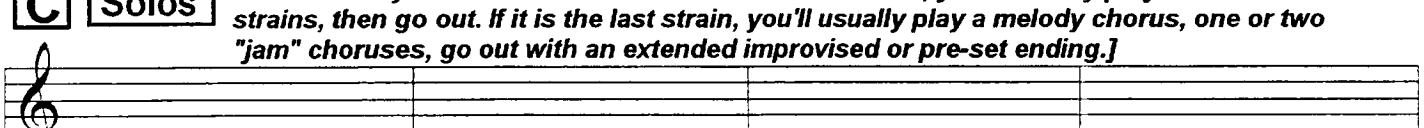

Dogfight *[Usually an introduction to a key change that gets you into the modulation.]*

Interlude *[A passage between strains.]*

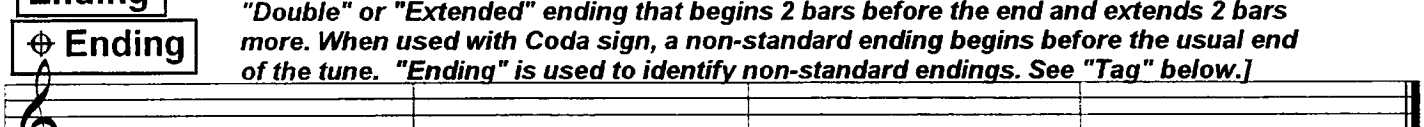

C **Solos** *[Usually the entire tune is played "as written", then you find the strain on which you play solos. Usually it's the last strain. If it's not the last strain, you'll usually play some other strains, then go out. If it is the last strain, you'll usually play a melody chorus, one or two "jam" choruses, go out with an extended improvised or pre-set ending.]*

Ending

⊕ Ending *[Usually, an ending is added onto the tune. Multi-strained tunes usually use a "Double" or "Extended" ending that begins 2 bars before the end and extends 2 bars more. When used with Coda sign, a non-standard ending begins before the usual end of the tune. "Ending" is used to identify non-standard endings. See "Tag" below.]*

Tag *TAG has 2 meanings: 1. a standard pattern where the tune stops suddenly, DRUMS play 4 (sometimes 8) bars, Band plays 4 (sometimes 8) bar ending.*
2. an additional 1-8 bars, usually pre-set. It could have been labelled "Ending", but "Tag" is commonly used so get used to the term.]

"ROUTINE:" Instructions are usually self-explanatory, but note that an instruction such as A A, B B, A, C C ignores *Repeat signs.*

1. (In the) Cafes in town, you are known as a clown, how
Happy you seem to be. But in
Back of the smile, there's a tear all the while, and
Heartaches that no one can see. For the
Life that you lead isn't real, well my friend, I know just how you feel.

2. Well, my friend, don't you know, that your life is a show, you'll
Wake up some day and find, it's too
Late to return, though your poor heart will yearn, for the
Real things that you left behind. For each
Moment you're smiling and gay, there'll be
Hours of sorrow some day.

In Clarinet range. *Alto and C melody sax are 8va*

The classic version of this fine tune (first introduced by ODJB) is by Frankie Trumbauer's band, featuring solos by Tram and Bix--Routine: Intro, Tram solo, Bix solo, melody. Eddie Lang's guitar accompanyment is also a classic example of the genre. You can extend the tune by playing melody first, add solos, play melody and a jam chorus out.

Optional B strain routine: This is rarely played. Usually when played, then the INTRO is the last 8 bars of what becomes the C strain.

223 Yes Sir That's My Baby (1)

♩ = 204 *Charleston feel*

Verse:
Who's that coming down the street,| Who's that looking so petite/

Yes Sir That's My Baby (2)

The ricky ticky licks and gizmos are taken directly from the vintage stock arrangement. Straight mute the brass, banjo 2/4, tuba 1/3, syncopated piano. Don't exaggerate the effect, because it's very likable music, different from Dixieland, a good changeup on most gigs.

Yellow Dog Blues

Rockin' 4/4

♩ = 134

c. Handy, 1914

ROUTINE: Infinite variation. Basically, play Verse 2-3 X, Chorus 2 X. SOLOS: Band plays first 9 beats, solo starts at break. 2nd X, just solo. Melody line is from the sheet music. First 4 bars of V and C are the key melody segments.

Blues Patterns

Learn these "cold", understanding that 1. there are variations, but memorizing them will enable you to follow faster and better. 2. many 20s tunes with "blues" in the title are not blues at all, merely pop tunes. Some like "Tishomingo" are partly blues, but have 16 or 32 bar patterns, non-blues progressions in the extra 4 bars, etc.

Pattern 1

Pattern 2

Pattern 3

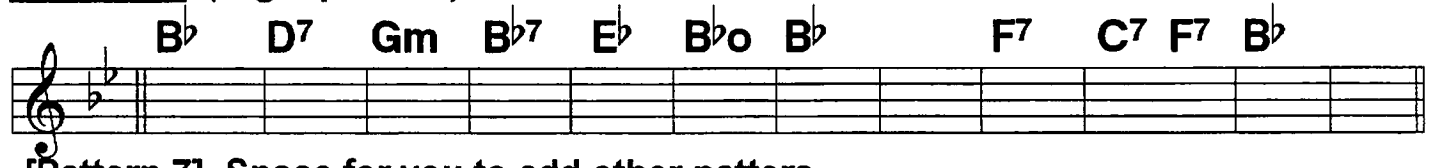

Pattern 4 (Dauphine Street Blues, Franklin Street Blues (C))

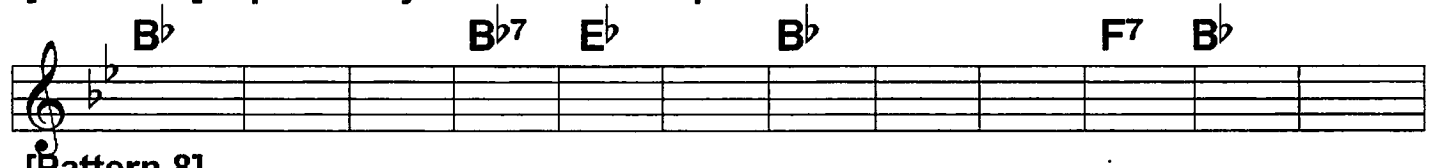

Pattern 5 (Empty Bed Blues, Mecca Flat (Bb), 219 Blues)

Hymns (2)

Just A Closer Walk With Thee

Standard tune, all occasions.

Old Rugged Cross

Hail To the Chief

Used to march CEO or President imitator to the Podium.
Usually there's only time for the first 1-2 lines.

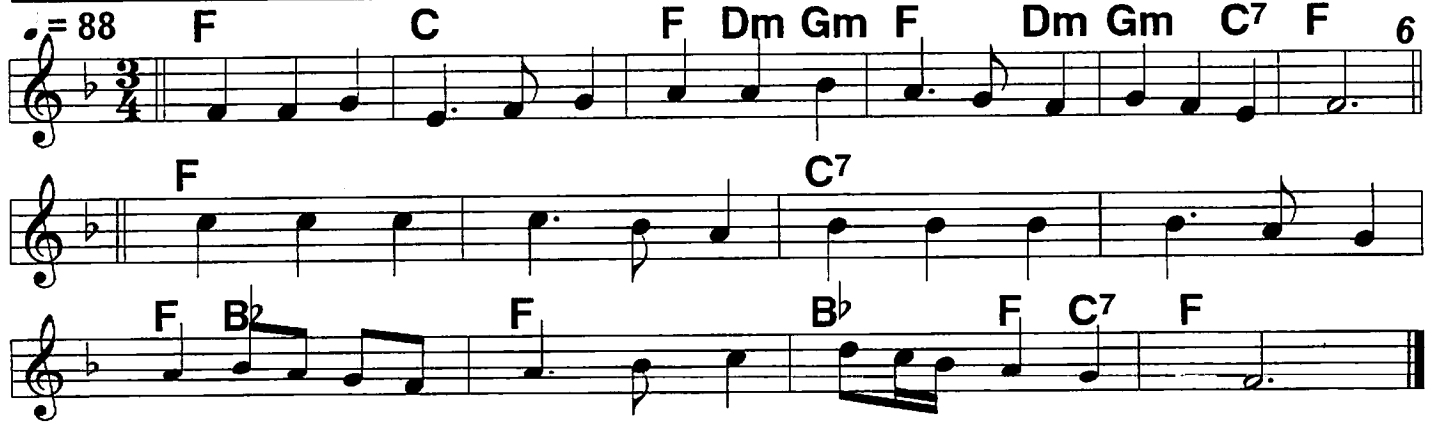

Square, Stately

America the Beautiful

America (My country 'tis of thee)

Star Spangled Banner

(Oh) Say can you see/ by the dawn's early light,/What so
Proudly we hailed/ at the twilights' last gleaming! Whose broad
Stripes and bright stars/ through the perilous fight,/ o'er the
Ramparts we watch,/ were so gallantly streaming; and the

Rockets red glare,/ bombs bursting in air,/ gave
Proof through the night/ that our flag was still there./ Oh
Say does that star spangled banner yet wave,/ o'er the
Land/ of the free,/ and the home of the brave.//

236 Battle Hymn Of the Republic

♩ = 192
March or Swing 4/4

Since "Dixie" is often requested at conventions by Southerners, but is politically incorrect, balance things by alternating both tunes. End on the most appropriate tune.

(Mine) Eyes have seen the glory of the coming of the Lord, he is
Trampling out the vintage where grapes of wrath are stored; He hath
Loosed the fateful lightning of His terrible swift sword,// his
Truth/ is/ march-/ing/ on.// //||

Glor-//ry glory halle- lu-// jah!//
Glor-//ry glory halle- lu-// jah!//
Glor-//ry glory halle- lu-// jah!//
Truth/ is/ march-/ing/ on.// //

Dixie

♩ = 144
Square, March, or Jazz

Don't voluntarily play it. Southerners request it all the time, but alternate choruses with "Battle Hymn", and if there are many Afro-Americans in the audience, don't play it.

(Oh I) Wish I was in the land of cotton,
old times there are not forgotten, Look a-
Way!// Look a- way!// Look a- way!// Dixie land./| In
Dixie land where I was born in,
early on one frosty morning, Look a-
Way!// Look a- way!// Look a- way!// Dixie land./| Then I

Wish I was in Dixie,/ hoo- ray// hoo- ray!// In
Dixie land I'll take my stand, to live and die in Dixie./ A-
Way,// a- way,//a- way down South in Dixie,/ a
Way,// a- way,//a- way down South in Dixie,/|

Military Medley (1)

Play in order given.
Navy is always last.

Army (Caissons Go Rolling Along)

Marines (From the Halls of Montezuma)

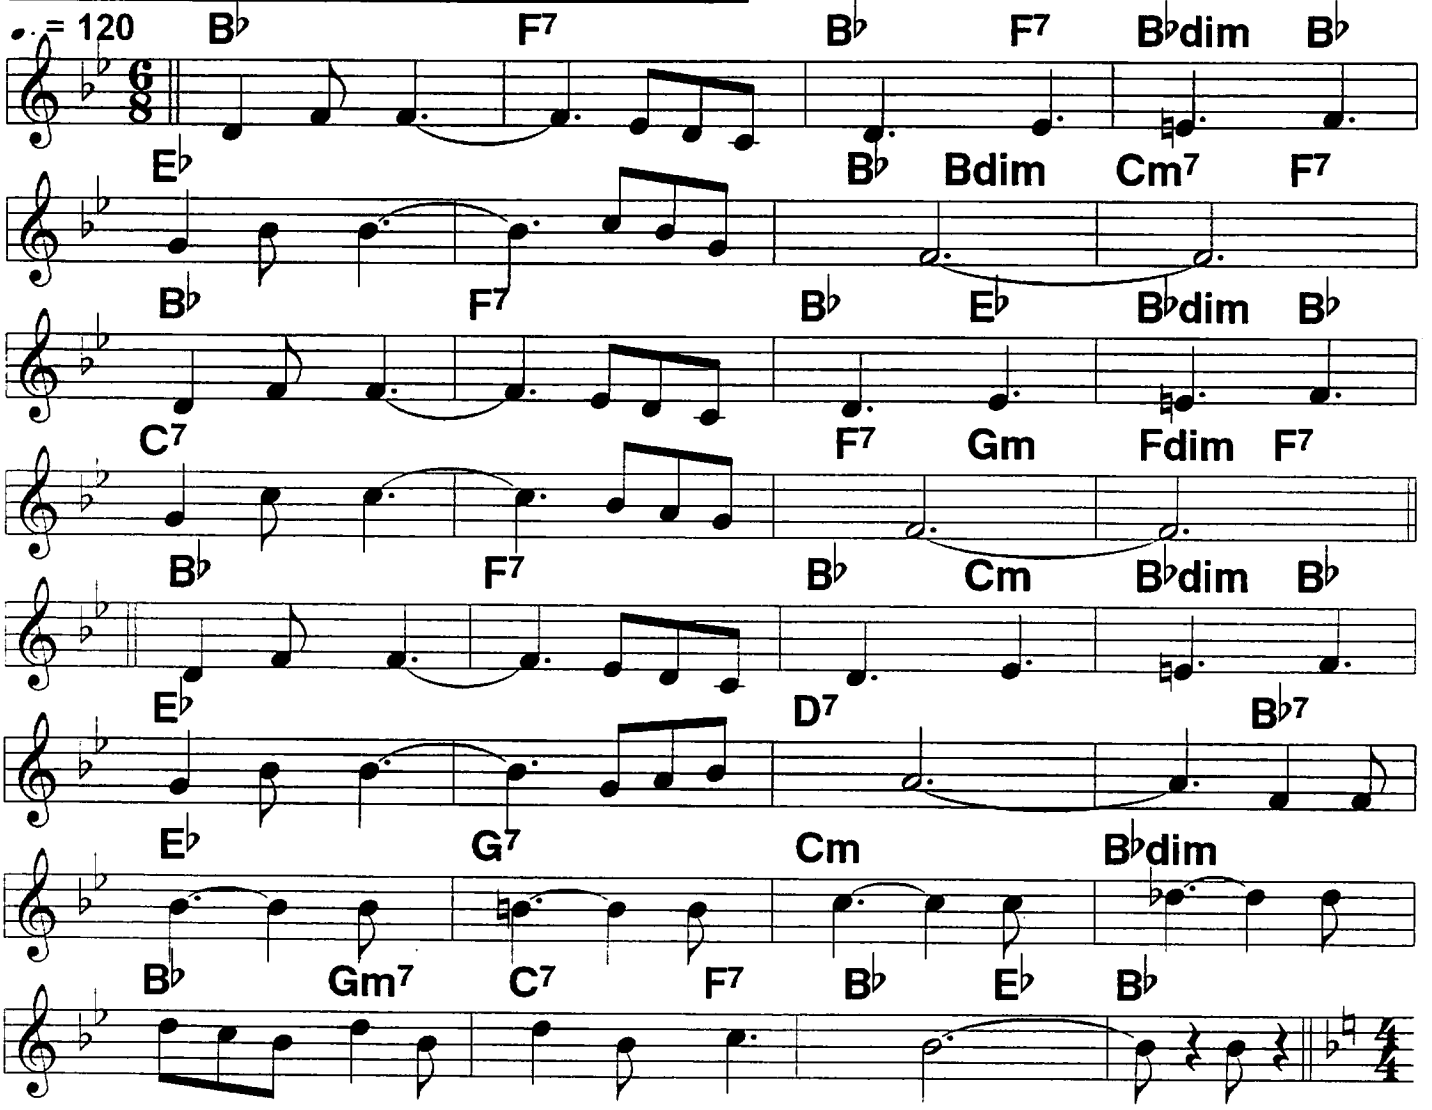

Military Medley (2)

Marines (cont.)

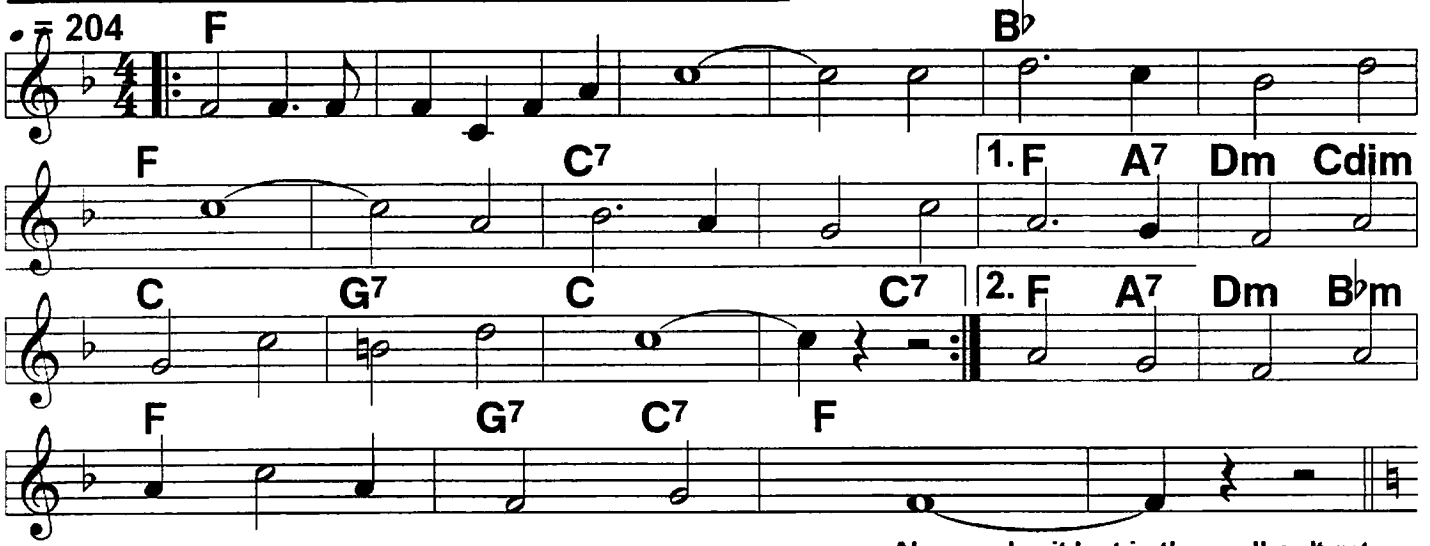

Air Force (Wild Blue Yonder)

Military Medley (3)

Coast Guard (Semper Paratus)

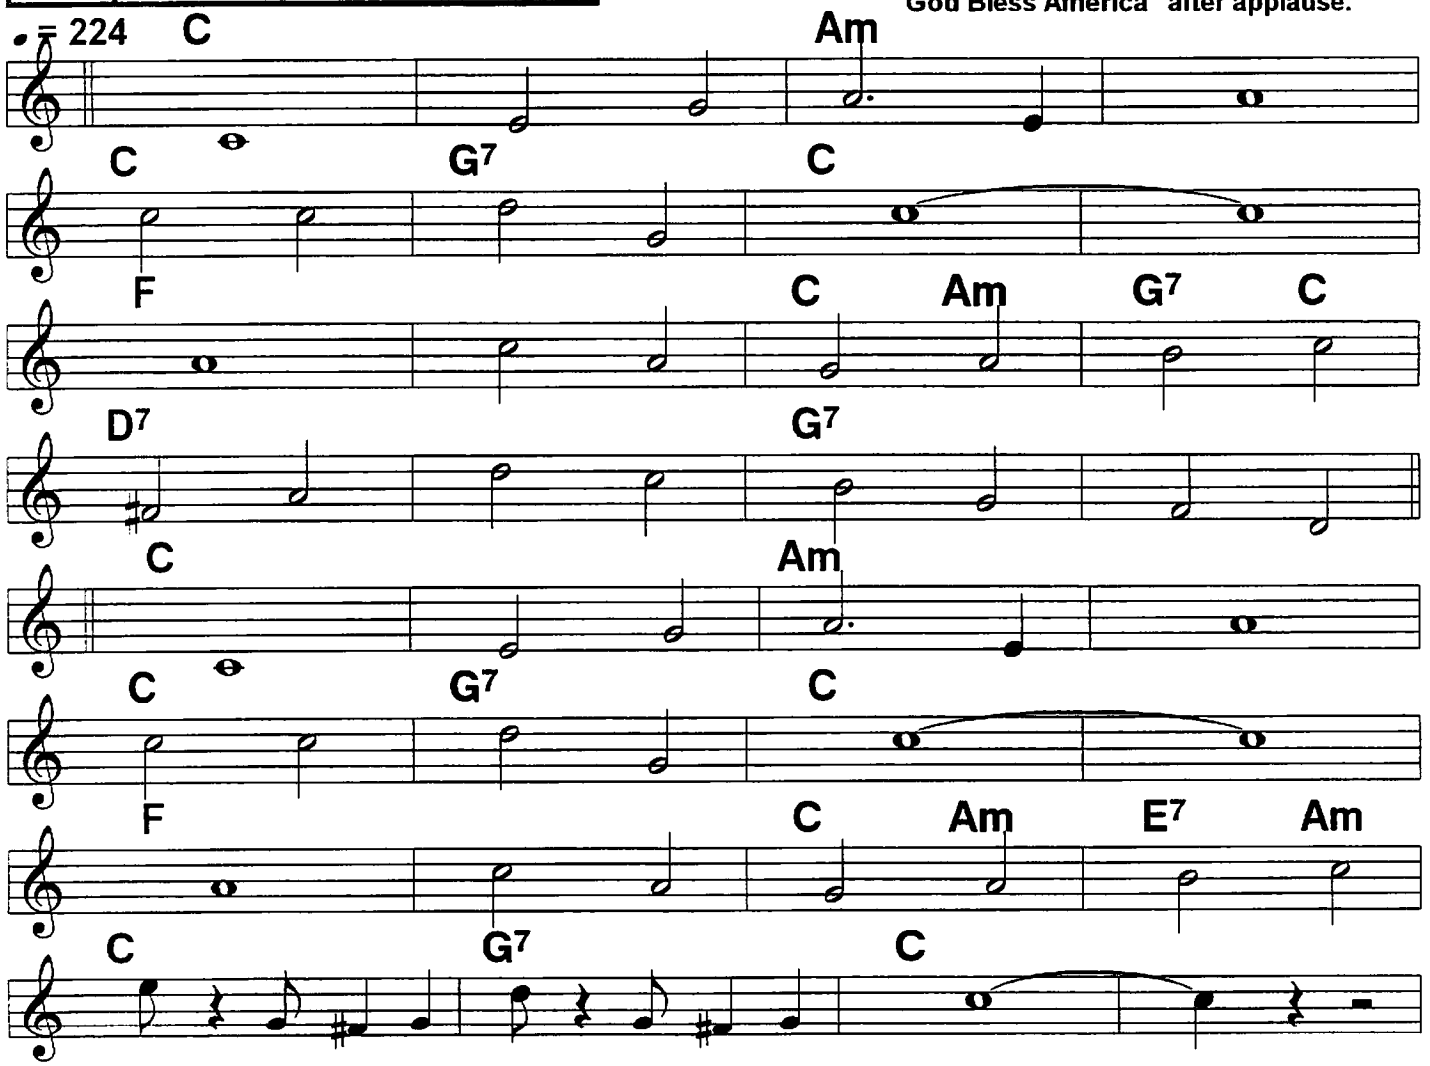

Optional -- Not usually part of the medley

Navy (Anchors Aweigh)

Strong 2-beat

Always play it last in the medley. It gets the best audience reaction. Or end with "God Bless America" after applause.

God Bless America

Not dirge slow. With due reverent patriotic spirit

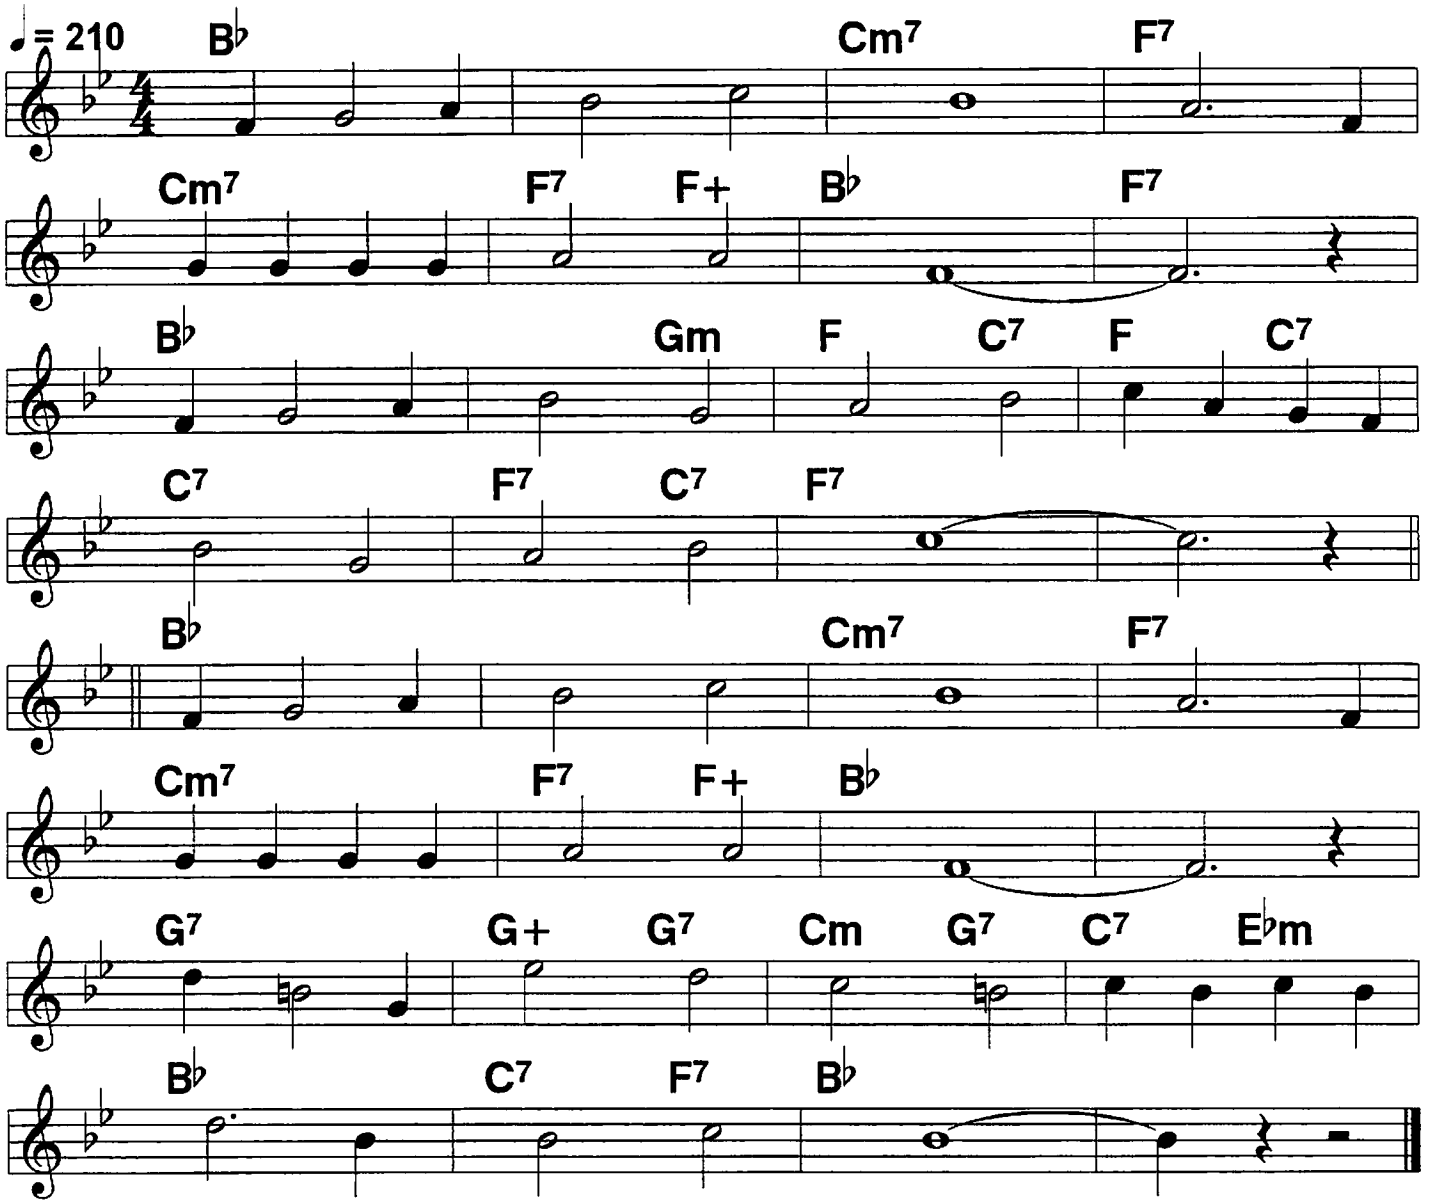

c. Berlin, 1938

240 Give My Regards To Broadway

A common convention theme is red, white & blue "Patriotic" or "Party Convention". Any Cohan tunes are considered appropriate, but they hired a Dixie, not a brass band (which would play Sousa marches, etc.) so you can mix these tunes in with familiar Dixie tunes.
